

The 25th International Congress and Exhibition of Computer Assisted Radiology and Surgery will take place from June 25 to 27 in Berlin, Germany.

The CARS congress with its associated journal is a facilitator of innovation and an important contributor to modern medicine on a worldwide basis. Founded in 1985, CARS with its focus on research and development for computer assisted systems and their applications in radiology and surgery has played a leading role in medical informatics for more than 25 years. Its growth and impact is due to CARS's close collaboration with the ISCAS, EuroPACS, CAR, CAD and CMI societies.
