

IEEE World Haptics Conference (WHC), 21-24 June 2011, Istanbul, TURKEY

This conference will bring together researchers from different disciplines who are interested in all aspects of haptics.

Areas of interest include, but are not limited to

- Design of haptic interfaces
- Tactile displays and sensing
- Haptic rendering and virtual environments
- Haptic cognition
- Haptic perception and psychophysics
- Biomechanics of touch
- Haptic guidance and motor control
- Shared haptics
- Applications of haptics in entertainment, media, medicine, rehabilitation, education, data visualization, art, rapid prototyping, remote collaboration, and nano/micro technologies
