

The **European Robotics Week** ( [www.robotics-week.eu](http://www.robotics-week.eu) ) offers every year one week of various robotics related activities across Europe for the general public, highlighting the growing importance of robotics in a wide variety of application areas. The Week also aims at inspiring technology education in students of all ages to pursue careers in STEM (science, technology, engineering and math) related fields.

Robotics@PoliMi is a joint initiative by Politecnico di Milano developed inside this framework and aimed at creating synergies among university's laboratories working on Robotic topics, providing a common access point to the Robotics research. The flier of the event can be found at [this link](#) .

During this event, on December, 13th a complete public demonstration of the results achieved within the Active project was deployed at [CNR](#) , via Bassini 15, Milano.
