

## **Robotics@Polimi**

The new portal of Politecnico di Milano about Robotics is now online !

Robotics is one of the core research lines @POLIMI since 1973, when the Politecnico di Milano Artificial Intelligence and Robotics Lab (PMAIR Lab) was funded. Since then, the multi-disciplinary activity in Robotics has been developed @Polimi in different Departments giving birth to several focused labs.

Robotics@POLIMI is a joint initiative aimed at creating synergies among those laboratories, and to provide a common access point to the Robotics research at Politecnico di Milano.
